

Connectors facing console

## Atari 7800 2 btns adapter

\* Either make a detachable adapter with 2x DB9 for use with your 2600/SMS cable above or connect directly on level shifter outputs to make a 2600/7800 specific cable.

\* Very important for DB25 pin 22 (I39/VN) to be connect to 3.3v for proper system detection.
